

2. [Maximum mark: 5]

The following diagram shows the graph of $y = f(x)$, for $-6 \leq x \leq 5$.

- (a) Write down the value of $f(-3)$. [1]
- (b) State the domain of f^{-1} , the inverse function of f . [1]
- (c) Find the value of x that satisfies $f^{-1}(2x - 7) = -3$. [3]
